

Brussels, 4 June > The Corrugated Board Factory of 2025

We are pleased to inform you that the 17th FEFCO Technical Seminar will take place on 22, 23 and 24 October 2013 at the Bella Center in Copenhagen, Denmark.

Over the years, the FEFCO Technical Seminar has become one of the best platforms for networking within the Corrugated Board Industry. It is the only dedicated conference and trade show for the European Corrugated Industry.

Once again for this 2013 edition, the FEFCO Production Committee has taken into account the delegates' suggestions and drafted a programme of a very high standard. As in the past, the content covers themes that will help corrugated board manufacturers increase their efficiency in running their operations; it is a combination of industry practical issues with everyday applications, case studies and visionary trends.

This year the theme of the conference is « **The Corrugated Board Factory of 2025** », and will cover the following topics:

- Raw Materials
- Zero Defect Technology
- Efficiency in Production and Logistics

The Preliminary programme can be found here: <http://www.fefco.org/technical-seminar-2013/conference-programme>

Between conference sessions, Spotlight sessions can be viewed by the delegates as well as the exhibitors. These Spotlights consist of 7 minute presentations and usually meet great interest amongst the delegates. They are becoming increasingly successful because they offer industry suppliers a unique opportunity to present their latest innovations to a large professional audience and allow them to highlight the constant improvement in technology and production processes taking place in the industry.

Another highlight of this Seminar is of course the exhibition which offers:

- Thousands of square meters of technological showcase. The exhibition features a host of machinery and accessories suppliers, as well as numerous service providers. The list of exhibitors is available on the FEFCO Technical Seminar website: <http://www.fefco.org/technical-seminar-2013/list-of-exhibitors>
- Hundreds of qualified visitors; and,
- Hundreds of contacts and opportunities to promote FEFCO Sympathiser members' technical solutions and innovations.

FEFCO is confident that delegates will gain valuable knowledge that they can share within their companies. During three days they will meet with the key people of the corrugated industry, exchange ideas with their customers or suppliers and examine future trends and industry challenges.

The last Technical Seminar was attended by almost 700 participants, including, delegates, exhibitors, visitors and guests. Since the 2 past events, attendance showed a substantial increase from corrugated industry managers. This year, FEFCO's objective is to continue attracting corrugated industry decision makers.

Note to the editors

FEFCO (European Federation of Corrugated Board Manufacturers) was established in 1952 and represents the interests of the European Corrugated Board Manufacturers. Headquartered in Brussels, FEFCO has 24 active members, all European national corrugated packaging organisations. The role of the Federation is to investigate economic, financial, technical and marketing issues of interest to the corrugated packaging Industry, to analyse all factors which may influence the industry, and to promote and develop its image.
