# FEFCO 16<sup>th</sup> Technical Seminar Munich, Germany

**Roberto Villaquiran**  
FEFCO Vice-President

Dear Members,

I am pleased to announce that the FEFCO board has agreed to launch a 5 years campaign for the promotion of the benefits of corrugated.

As presented during the FEFCO Summit in Barcelona, the objective of the Market & Environment Committee is to raise the profile of corrugated and to build a sustainable future for this unequaled material.

We all know that corrugated has fantastic properties: it is environmentally sound, has a record recycling rate and an incomparable recycled content; in addition it is a renewable resource.

Corrugated displays and packaging offer excellent printing, branding, promotional and selling possibilities. It is versatile, flexible and fit for purpose. In the supply chain, it offers perfect space efficiency, in transit, at the warehouse, but also on shelves. This means fewer trucks on the road and less CO2 emissions.

Yes we all know this, now it's time to shout this loud and clear.

I am determined to unite our voices around some elemental key messages to make Corrugated the preferred choice. Corrugated packaging deserves it!

I count on your support and look forward to a united way forward for our industry

Roberto Villaquiran  
Vice-President of FEFCO

## FEFCO Technical Seminar offers a unique Technical platform for the Corrugated Industry and its suppliers

We are pleased to remind you that the 16th Technical Seminar organised by the FEFCO Production Committee will be held on **23<sup>rd</sup>, 24<sup>th</sup> and 25<sup>th</sup> March 2011** at the Olympiapark Event Arena in Munich. Following a successful Seminar in Berlin, FEFCO will host its bi-annual event for the first time **in Munich**.

Why this venue? Mainly because Germany, and especially Munich, is a central location in Europe, easily accessible for all our members. In addition, the Event Arena is the perfect place for such a Seminar, offering great exhibition space and a convenient conference area which will be reserved solely for FEFCO's use. We are confident that this new venue will meet the high expectations of our delegates and our valued exhibitors.

### Conference Programme

In 2011, the content of the conference will continue to focus on production and technically oriented topics. 3 main sessions will cover the following themes:

- Efficiency in maintenance, production & logistics
- Best Use of Raw Material
- Corrugator Process Control

### What's new?

- As usual we have incorporated the feedback from delegates at past events, which is why the Spotlights sessions will be accessible to all participants, including the

exhibitors who do not usually participate in the conference sessions (for example stand personnel).

- Also in Munich, the **Exhibitors** will be able **to invite guests to the exhibition floor** at a day fee of **100 €**, including **non FEFCO members**. Invitation tickets will be available upon request.

### Exhibitors – Sympathiser Members of FEFCO

This exhibition is reserved for FEFCO Sympathiser Members.

Stand registration has now opened, and exhibitors will find the plan of the exhibition floor and the Stand Booking Form on the FEFCO website.

As is now usual, information will be sent exclusively by e-mail, and in the first instance information will be sent to your usual official contact for all FEFCO communications.

If your company does not yet have a named FEFCO contact, or if you wish to be added to the mailing list, please contact Sabine Kariger: [sabine.kariger@fefco.org](mailto:sabine.kariger@fefco.org)

If your company wishes to become a Sympathiser Member of FEFCO, please contact [johanna.kloeck@fefco.org](mailto:johanna.kloeck@fefco.org)

### Conference Registration

Conference registration will be available on-line early in November 2010, and invitations will be e-mailed to all FEFCO members.

# 23, 24 and 25 March 2011

## Event Arena

### Preliminary Programme

#### Wednesday 23 March 2011

09.00	Registration
10.00	Exhibition starts
12.30	Standing Lunch
13.30	Opening of the Conference
13.45	Conference Session on Efficiency in Maintenance, Production and Logistics
16.00	Coffee Break
16.45	Spotlight session 1
17.45	Session ends
19.00	Exhibition closes

#### Thursday 24 March 2011

09.00	Conference Session on Best Use of Raw Material - part A, B
10.30	Coffee Break
11.30	Spotlight session 2
12.30	Seated Lunch
14.30	Conference Session on Best Use of Raw Material - part C
16.00	Coffee break
16.30	Spotlight session 3
17.30	Session ends
19.00	Exhibition closes

#### Friday 25 March 2011

09.00	Spotlight Session 4
10.30	Coffee Break
11.00	Conference Session on Corrugator Process Control
12.30	Award Ceremony
13.00	Seated Lunch
14.00	Exhibition closes

### Hotel Accommodation

FEFCO has pre-booked rooms in a selection of 7 different hotels located either in the center of Munich or near the exhibition venue. A description of each hotel will be available on the hotel section of the Technical Seminar website.

Hotel Booking will be available soon, with the hotel booking form accessible on the FEFCO website. We would ask you to follow the instructions carefully, and we recommend that you book your room as soon as the registration starts. The deadline for hotel reservations will be 26 January 2011.

We also remind you that although rooms are reserved for FEFCO at a special rate, it is sometimes possible to find cheaper rates under certain conditions.

### Website

A website dedicated to this Technical Seminar in Munich is now online, directly accessible from the FEFCO Home page, with information about the fees and other practical details.

### Stand booking

To reserve a stand, please contact Ria Van den Bogaert: [ria@vandenbo.com](mailto:ria@vandenbo.com) or fax back the registration Form which is now available from the FEFCO website.

### Spotlights

Spotlights consist of short presentations of the latest technological innovations by corrugated industry's suppliers. They generate great interest amongst the delegates.

To apply for a spotlight, please contact FEFCO Secretariat at [info@fefco.org](mailto:info@fefco.org)

### Contact for Sponsorship opportunities

Nathalie Schneegans, Communications Director:  
+ 32 2 650 08 32 - [nschneegans@fefco.org](mailto:nschneegans@fefco.org)

### Event Arena - Olympiapark

For additional information about the event arena, visit: [www.olympiapark.de](http://www.olympiapark.de)

# BOXING THE FUTURE.

FEFCO Summit  
Barcelona

## FEFCO Summit 15-17 September Barcelona

The corrugated industry explores new ways of boxing the future

Bob McLellan, President of FEFCO

The first FEFCO Summit in Barcelona, taking place from 15<sup>th</sup> to 17<sup>th</sup> September, brought together over 300 participants from the European corrugated Industry, including related industry organisations and suppliers.

The number of participants, coming from more than 30 different countries, was more than double the number attending the last comparable Congress two years ago. *"This is very encouraging and a turning point in the recent history of FEFCO's events"* declared Bob McLellan, President of FEFCO.

### Industry Leadership and Industry Perspectives

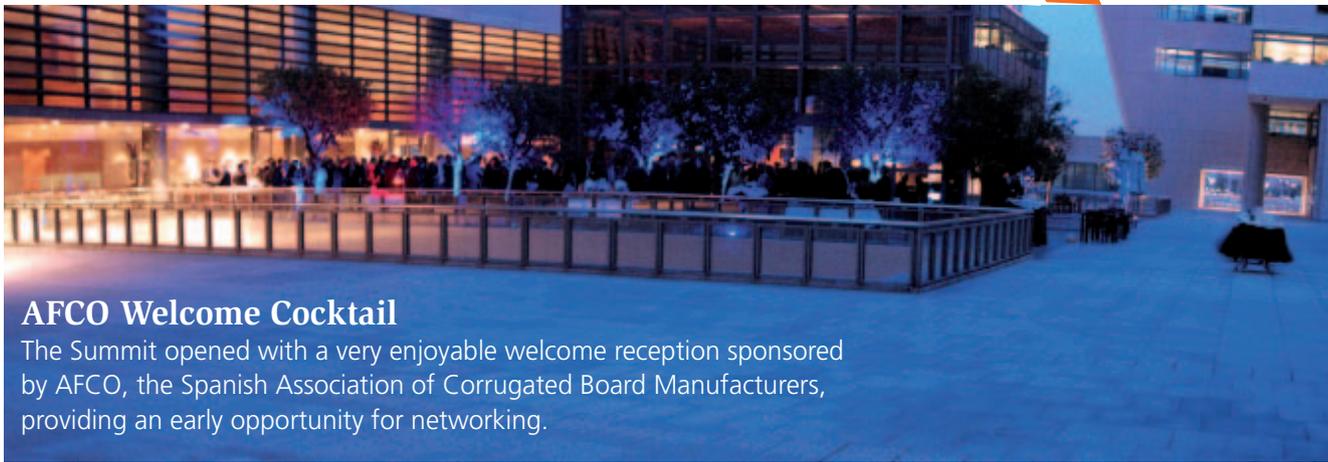

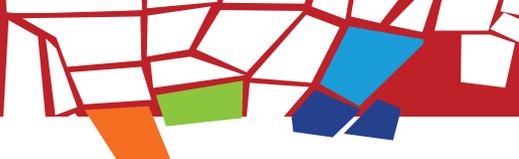

Commenting on the event, Angelika Christ, FEFCO Secretary General, said that the title **"Boxing the Future"**, (which was chosen during the worst period of the recent economic crisis), gave an optimistic expectation that Corrugated Packaging will be the material of choice for the next generation.

The Summit opened, as is now customary, with a detailed and informative overview of the market of the host country, in this

instance Spain. In the presentations given by Leopoldo Santorromán - President of AFCO and of by Mr. Enrique Isidro of EUROPAC, both speakers explained to the audience how the Spanish corrugated sector has been dealing with the crisis.

Mr. Enrique Isidro presented detailed data on the market situation, speaking about productivity ratios, staffing, market shares, ranking of Spain versus other European countries etc. He also presented some ideas to help speed the recovery from this difficult period.

## AFCO Welcome Cocktail

The Summit opened with a very enjoyable welcome reception sponsored by AFCO, the Spanish Association of Corrugated Board Manufacturers, providing an early opportunity for networking.

“Enjoyed the Summit because of delegates profile and number of people; quality and content of presentations; atmosphere; opportunity to meet people in the industry and the venue.” *Jukka Valkonen - Tieto*

Enrique Isidro (EUROPAC)

Tony Smurfit (Smurfit Kappa Group)

Klaus Thimm (Thimm Verpackung)

Tony Thorne (DS Smith)

Despite the fact that Spain has been hit most severely by the crisis, what emerged from these speeches was the conclusion that recovery is on the way, although it might take more time than in some other European countries (such as Germany or Italy). Nevertheless corrugated board is still the worldwide Number One in packaging, and the industry has shown great resilience. According to the Spanish speakers, it seems that the crisis “allowed them” to find new ways to adjust to changes and to adapt to a difficult market environment.

One of the main highlights of the first day was the keynote session “**Views & Reflections of 3 Industry Leaders**” with Tony Smurfit (Smurfit Kappa Group), Klaus Thimm (Thimm Verpackung), and Tony Thorne, recently retired from DS Smith, presenting their different predictions and reflections on the corrugated packaging industry.

### Some key points:

Mr. Tony Smurfit’s message was that corrugated is “a sustainable good business”, one that hopefully will turn into practise

industry-wide. He reminded Summit participants that corrugated is an excellent product that we should be proud of. He was warmly applauded when he expressed his determination to fight for the market share of corrugated amongst all other packaging materials, and to support FEFCO’s work and objectives.

Klaus Thimm gave an overview of his 45 years of experience, recounting the development of the corrugated industry, and sharing his views on the challenges and opportunities for the future. This very positive

“Because the mixture of content about corrugated and other topics was useful and interesting”

Gyöző Demény- Dunapack Packaging

Professor Risto Kuivanen (VTT Finland)

Professor Pedro Videla (IESE Business School)

Professor Peter Frans Anthonissen (A&A)

approach demonstrated some of the various ways to succeed, with everyone having a choice in finding the best strategy for their own company. He maintained that regardless of what is the right size for a company or what is the most appropriate strategy, what is certain is that the corrugated world will always be an exciting one!

Delegates listened carefully to Tony Thorne’s very open speech with its strong messages. They strongly supported his idea that corrugated packaging is not a commodity but a product which has so much to offer. It is an effective packaging solution which often delivers more value than the customers realize, and it is the duty of everyone in the industry to explain the cost savings that can be achieved by using the optimum design of corrugated packaging.

The remainder of the programme covered many aspects of the day to day running of the corrugated industry, and the challenges raised by our customers and by the retail trade. It also incorporated issues that went beyond those inside corrugated.

The list of speakers included eminent academics such as Professor Risto Kuivanen (VTT Finland), Professor Pedro Videla (IESE Business School), and Professor Peter Frans Anthonissen (A&A) who talked about the many aspects of the industry and its supply chain issues.

In his address on “The Future of the Manufacturing Industry in Europe”, Professor Risto Kuivanen, explained what delocalisation and globalisation mean for our industry and what the challenges are. The audience appreciated the conclusion that after many years of delocalisation of our customers outside Europe, some have started to come back!

Professor Peter Frans Anthonissen gave a talk on Crisis Management, a topic important for most industries, especially in a time where the media has an enormous impact on the psychology of business. In his presentation “Murphy was an optimist”,

## Afternoon activities and site visits

In the afternoon, some delegates were given the opportunity to participate in site visits, one of which was to the Cordonú Winery, where Summit participants were guided through an impressive network of cellars and enjoyed some wine tasting. What better way to have a clearer

understanding of an ancient profession, presented by wine makers who have been customers of our industry for many decades!

Others had an exclusive opportunity to get an update on the latest digital printing technologies and to find out more about digital printing solutions for the corrugated industry, visiting one of the most advanced HP demo centers in the world. Visitors were impressed by this site and inspired by the experience, seeing at first hand the most advanced and up-to-date printing solutions. They were given an insight into a number of high-tech printing possibilities and came away with a host of new and inspirational ideas for the packaging solutions of tomorrow!

What this visit showed was that nowadays there are printing solutions that would have been unimaginable a few years ago, and that the industry is ready to respond to the changing demands of our customers and their rapidly evolving brand and market requirements!

For further details, please contact:  
**Thibault Dejaiffe - HP Graphic Solution Business** [thibault.dejaiffe@hp.com](mailto:thibault.dejaiffe@hp.com)  
**Tel: +32 478 87 80 57**  
[www.hp.com/go/pspnetwork.com](http://www.hp.com/go/pspnetwork.com)

Roberto Villaquiran, FEFCO Vice-President

he showed that a crisis could also be an opportunity, especially for those companies who are well prepared to deal with it and who have set up a working group capable of dealing with crisis communication.

Professor Videla's inspired presentation reported on climate change, talking about the many indicators contributing to the rapid development of the world's economies and the effect on the environment. He described some of the positive outcomes from his study on the respective impact on the environment of corrugated packaging and other competitive materials. His presentation resulted in numerous questions from the audience.

Everyone appreciates a little entertainment, so FEFCO presented a multimedia show especially put together for this event. It featured a 10 minute medley showing how

**"My expectations for any FEFCO event are always very high! ;-) However I really liked the increased number of participants!"**

*Dr. Jan Klingele - Klingele Papierwerke GmbH*

brands are using corrugated to promote their product on TV or on the internet, demonstrating how corrugated can carry positive messages!

Delegates seemed to appreciate the light relief, and enjoyed being reminded of the AUDI advertisement where a car is constructed using corrugated board.

### Shout loudly about the benefits of our material

Another key feature of this conference was the session dedicated to the promotion of corrugated. The promotion of the benefits of corrugated at European level shows that we are a sustainable industry offering high-tech packaging solutions, with impressive recycling rates above 80% all over Europe, but we must "spread the word".

Roberto Villaquiran, Vice-President of FEFCO, went into more detail, calling for a harmonised communication approach and united action in an industry with over 450 companies Europe-wide, and pointing out that unity is a real challenge! He presented his ideas for the coordination of promotional activities throughout Europe, stating that even though the "what" is crystal clear the "how" certainly leaves room for discussions and brainstorming.

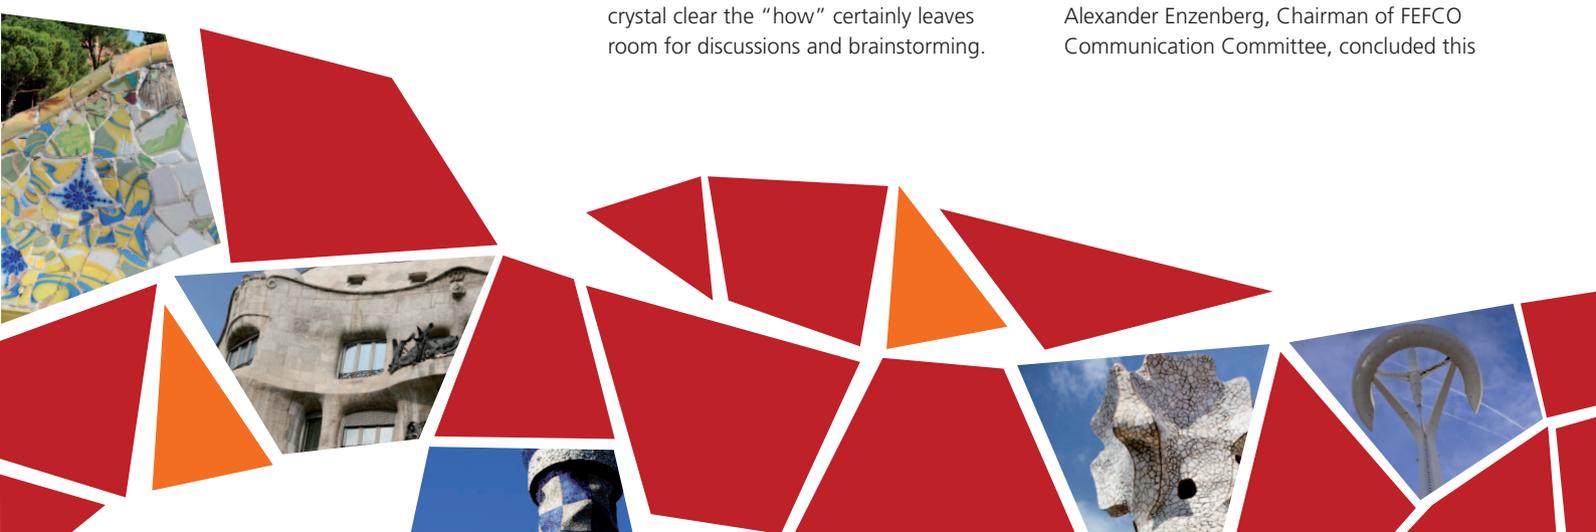

He concluded that FEFCO would play a central role with regard to communication activities.

FEFCO is confident that positive, clear and coordinated communications from the Industry will result from this summit, and FEFCO is ready to continue promoting the fantastic qualities of our exceptional packaging material. The commercial benefits of corrugated packaging result from it being light-weight, flexible and helpful to customers through the use of high quality print for promotions. Not only can corrugated packaging help to increase sales, but it is an excellent example of a sustainable product, thanks to its exemplary achievement in recycling. Industry customers and retailers alike are highly appreciative of our contribution to closing the recycling loop!

The Summit ended with the long awaited screening of the Plastic Planet movie, presented by the film's Director Werner Boote. The purpose of this session was simply to spread knowledge within the industry, and the presence of Werner Boote greatly helped to put his ideas into perspective.

Alexander Enzenberg, Chairman of FEFCO Communication Committee, concluded this

Summit by outlining the three main reasons for its success:

- The Content was ambitious, and he thanked the speakers for their input which was the key contribution to the success of this event.
- The Networking opportunities were excellent due to the doubling of the number of participants, with delegates sharing some enjoyable times in good company - back to the good old times!
- The location in Barcelona and the wonderful hotel Grand Marina in the middle of the port, with its excellent venues, and the unforgettable Catalan food, all played their part!

**“Excellent networking opportunity for us as a supplier to the industry. Also good way to keep abreast of industry issues”**

*Anonymous*

Alexander Enzenberg thanked the delegates for attending the Summit despite the postponement due to the air traffic situation after the Icelandic volcano eruption in April. He was pleased to see that both participants of the corrugated packaging industry and their suppliers, after an inspiring time in Barcelona, were able to return home with new ideas and new business contacts.

*Alexander Enzenberg,  
Chairman of FEFCO  
Communication  
Committee*

He called for support for the next Summit in 2012, telling participants that because of the huge success in Barcelona the expectations are now even higher! To the sound of a well-known waltz, he announced that the next venue will be Vienna, The City of Waltzes! Who knows, the President may well open the 2012 event, celebrating 60 years of FEFCO by dancing to The Blue Danube waltz!

The artist Valentino Menghi has recreated and reinterpreted the city of Barcelona. This work was presented during the exhibition “REUSA BARCELONA” held at la Sala Vincon in Barcelona. Contact: [safia@galeriasafia.com](mailto:safia@galeriasafia.com)

# Recycling

A commitment for the future

The European Recovered Paper Council (ERPC) was set up following the launch of the First European Declaration

on Paper Recovery in November 2000, with the aim of monitoring the progress made towards meeting the targets set out in the Declaration.

The latest monitoring report shows that **Europe has achieved a world record level of paper recycling in 2009. The rate reached 72.2%** which is once again higher than the target set in its Commitment for 2010 of 66%, and **in 2009 the total recycled in paper mills amounted to 58 million tonnes.**

By joining the European Declaration on Paper Recycling, ERPC members committed themselves to carrying out qualitative actions, in particular by using the eco-design of paper products to improve the recycling rate by 2010. The members represent 14 sectors along the paper value chain, and in 2008 and 2009, ERPC members dedicated a substantial amount of their time to several initiatives that would facilitate the recycling process and increase recycling activity.

2010 is the last year of the current 5-year commitment, and the results of this target period will be known in mid-2011. At the same time, the members of the European

Recovered Paper Council are already preparing for the new, third European Declaration on paper recycling.

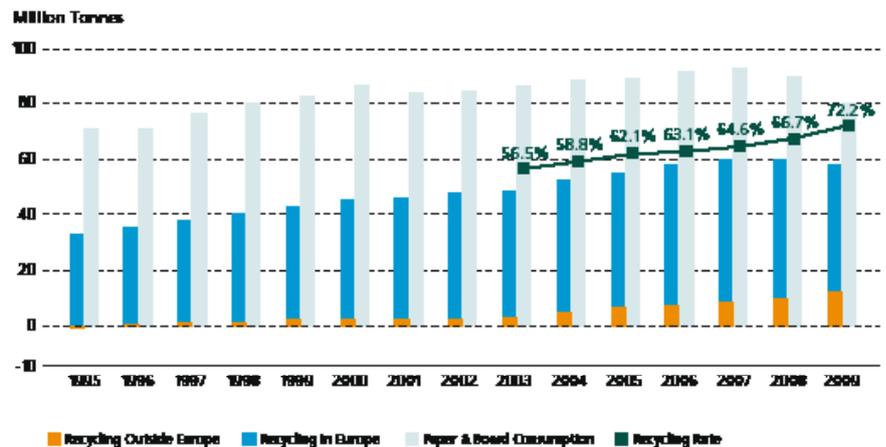

The first discussions in the ERPC indicate willingness to continue with the current structures. The quantitative and qualitative targets, however, will be reviewed and revised by the ERPC Technical Committee, which has scheduled two extraordinary meetings in December and February before the next ERPC meeting early April.

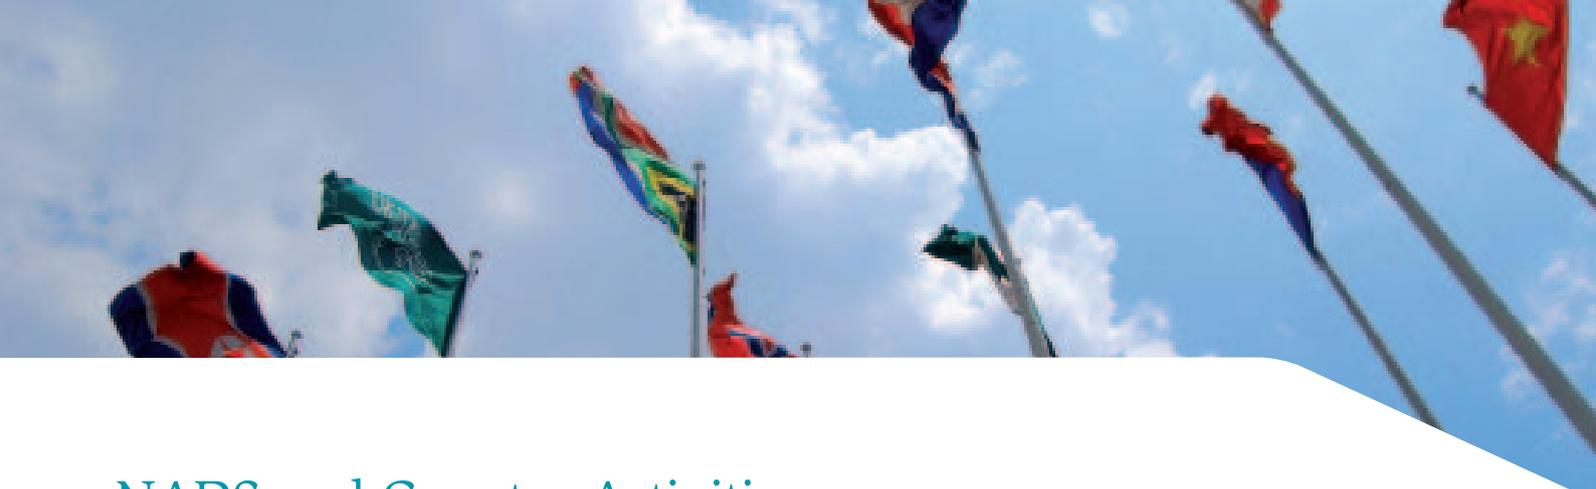

The new European Declaration is expected to be adopted by all 14 members before

summer and launched at a special event in the European Parliament in September 2011. The event will also see the presentation of European Paper Recycling Awards to the best projects promoting paper recycling.

CITPA is member of the ERPC. For more information, please contact the ERPC Secretariat, Jori Ringman at +32 2 627 49 19 - erpc@cepi.org or visit: [www.paperecovery.eu](http://www.paperecovery.eu)

## European Paper Recycling 1995-2009

## NADS and Country Activities

### Austria– New Heights for Corrugated with Forum Wellpappe

In July 2010, Forum Wellpappe Austria sponsored a competition called **“Flying Corrugated Board”**, whose objective was to stimulate young corrugated board professionals. They were invited to participate in the apprentice competition organised during the Scalaria Air Challenge 2010, described as the the biggest aeroboat meeting in Europe, on lake Wolfgang in Austria. The event was later described as a ‘sensational success’.

Ten apprentice teams from the corrugated board industry took an adventurous leap into Lake Wolfgang, demonstrating the aerodynamic properties and the visual appeal of their designs (see pictures of the winners on the right). Approximately 4000 visitors were able to see a display of the ten most attractive corrugated flying machines on the lake promenade, from where they watched this unusual aerial contest.

We congratulate all the other teams from the following companies, who also

participated in the apprentice competition:

- Duropack Vienna and Kalsdorf
- The 2 teams of Dunapack Mosburger (Straßwalchen and Vienna plants)
- The other teams of Rondo Ganahl (Frastanz and St. Ruprecht plants)
- TEWA

During the award ceremony, Georg-Dieter Fischer (Chairman of the PPV

Austria Association) emphasised the great importance of apprentice training in the corrugated board industry for the future and safety of our industry.

For further information please contact:  
 Forum Wellpappe Austria  
 Mr. Alfred Bartosch  
 + 43-1-505 53 82 – ext. 34  
 forum@wellpappe.at  
 www.wellpappe.at

### Corrugated high in the sky thanks to this Austrian apprentice competition

*SCA Packaging team- won the competition with its “Team flying toilet”*

*“The dragon tamers” won the second price (Mondi Grünburg and Mondi Möderbrugg)*

*The Jet team of Rondo Ganahl Frastanz won the third price of this competition*

### The competition in detail

Between March and May 2010 the apprentice teams designed and built their flying objects made of corrugated board. They were strongly supported by their training companies, the Austrian corrugated board manufacturers, and by their instructors. The only materials allowed were corrugated board or a combination of corrugated board and paper, as well as fastening materials. The VIP Jury was drawn from the food trade, as well as the world of recycling, tourism and sport, and also from the corrugated and wider packaging industries.

## France / ONDEF

**Ms. Isaure d'Archimbaud has been nominated as the new Secretary General of ONDEF (L'emballage**

**Ondulé de France) replacing Mr. Olivier de Lagausie.**

Isaure d'Archimbaud, a law graduate, can point to a wealth of experience within a number of professional organisations. She has held the positions of Research Manager and Manager of European coordination at the French Federation of Insurance Companies (FFSA), and that of Environment Manager, reporting for the strategic committee of Sustainable Development to the National Association of Food Industries (ANIA). Throughout the same period, she created and managed an auto-insurance brokering agency within INIA. Concentrating on environmental issues she then went on to create her own strategic advice agency, specialising in environmental/sustainable development and lobbying at both French and European levels.

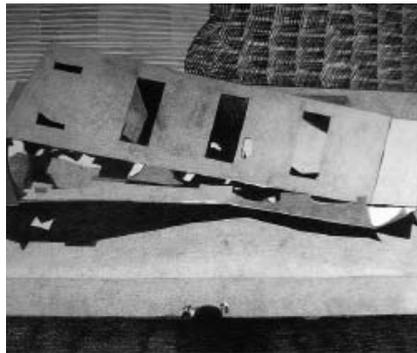

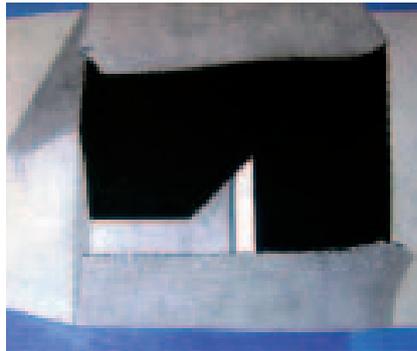

As Secretary General of ONDEF she will represent the interests of the French member companies at both national and European level and will promote the benefits of corrugated board and packaging as the first choice for transport packaging of products both in France and across the world.

Isaure's background and experience will be extremely important in ONDEF's programme of continuous product development and in the promotion of corrugated materials, whilst at the same time emphasising the importance of the ecological advantages of recycling.

ONDEF is a professional organisation representing all of the major industrial producers and converters of corrugated board in France. Together, these manufacturers operate from 64 production units with almost 10 000 employees, with an output of 2,3 million tons and with a value of 2098 million Euros.

For further information please contact ONDEF at [sec@ondef.org](mailto:sec@ondef.org)  
ONDEF - 154 boulevard Haussmann  
75008 Paris - France  
Tel: + 33 (0)1 53 89 25 40  
[www.ondef.org](http://www.ondef.org)

## Italy / GIFCO

Exhibition **"Cartonboard castles"** - Castle of Sarteano, near Siena, August 2010.

GIFCO (the Italian Corrugated Board Association) sponsored the Exhibition "Cartonboard Castles" by the artist David Booker.

Someone produces it, someone utilises it, and someone else recycles it. Sometimes, somebody uses it to protect himself from cold. David Booker has chosen corrugated as the subject of his art, which is the reason why GIFCO has sponsored Booker's artworks recent exhibitions.

The "Cartonboard Castles" drawings are part of a series of still life pencil drawings that David Booker has dedicated to corrugated, boxes and cartons.

When asked, he could not explain why he draws packaging and boxes: "Every drawing seems itself a magic box, in which untold stories are shown in black and white.

"The lives of corrugated are infinite". This is the title of Booker's new project.

For more information, visit David Booker's website at [www.davidbookersculptor.eu](http://www.davidbookersculptor.eu) or contact him at [davidbooker@cheapnet.it](mailto:davidbooker@cheapnet.it)

## Germany / VDW

### Forum Wellpappe at Fachpack

« Forum Wellpappe » organised by VDW (the German Corrugated Packaging Association) was held on 29 September 2010 during the Fachpack packaging fair in Nurnberg.

"Eco-efficiency: the principle of Corrugated Board" is the central principle of this year's Forum Wellpappe.

In a series of presentations and panel discussions, experts from the fields of science, consumer goods and the food industry each highlighted, from their own perspective, the merits of corrugated packaging materials.

Dr. Jan Klingele, Chairman of VDW, emphasised the ecological and economic advantages of corrugated board materials, whilst Dr. Siegfried Kreibe, BIfA of the Bavarian Institute for Applied Environmental Research and Technology spoke about the importance of paper products as an environmentally friendly product with a favourable energy cycle. Christoph Hahn-Woernle requires to be more conscious when boxing products: "There is still too much air transported in packaging." The use of environmental labels on packaging is one way to inform customers about the environmental motivation of the manufacturer, according to Wolfgang Siegel, Dr. C. Soldan GmbH. Thomas Bachl of GfK Panel Service argued that such labels can also help to respond to consumer demand for 'organic', sustainability, fair trade, etc., all of which play an increasingly important role in trade and industry.

For Further information, please contact Dr. Oliver Wolfrum, VDW Secretary General  
Hilpertstrasse 22 - 64295 Darmstadt  
Tel.: +49 (0) 6151 929516

# FEFCO Activities

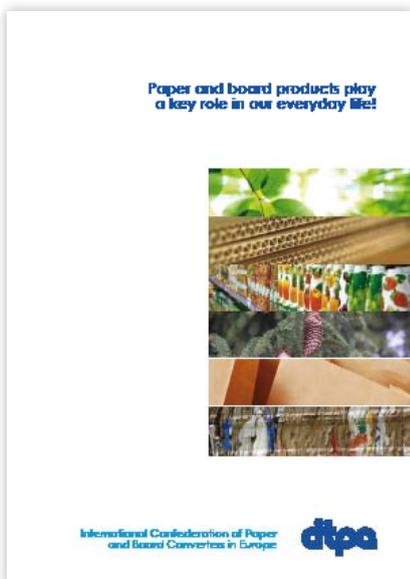

## New Polish Board member for FEFCO

**Tomasz Zebrowski**, CEO of Stora Enso Corrugated Business in Poland, representing the Polish Corrugated Board Association, will replace Ryszard Kolodziejski, retired from Eurobox division Ukraine.

We thank Mr. Ryszard Kolodziejski for the many years he spent on the FEFCO Board, and for his work as a Vice-President of FEFCO.

## A new brochure for CITPA

The International Confederation of Paper & Board Converters in Europe has just launched its new brochure named Paper and Board products play a key role in our everyday life!

If you would like to obtain a copy, you may either download it from the CITPA website or ask for a copy at [info@citpa.org](mailto:info@citpa.org)

International Confederation of Paper and Board Converters in Europe aisbl  
avenue Louise 250, box 108

Tel: +32 2 626 98 38  
Fax: +32 2 646 64 60  
e-mail: [info@citpa-europe.org](mailto:info@citpa-europe.org)  
[www.citpa.org](http://www.citpa.org)

## FEFCO has created a Past Event archive in its workgroup system

This new workgroup contains the PDF of most presentations from events organised by FEFCO in recent years (Past FEFCO Congresses, Technical and Marketing Seminars).

These documents are accessible to all FEFCO members using their login & password, and the **Past Event** folder may be found at the following address: <http://workgroups.fefco.org>

If you do not yet have your own code, go to FEFCO's home page [www.fefco.org](http://www.fefco.org) and enter the member area, the link for which is at the top right of the page.

The presentations from the latest Summit, held in Barcelona in September 2010, are for the moment only accessible to the Summit delegates and are stored in a dedicated workgroup "**Summit Participants Barcelona**". In a few months, they will also be added to the Past Event archive workgroup.

## EU Parliament movie on corrugated

The European Parliament recently made a film about corrugated with the support and active involvement of FEFCO. The film shows the whole process of corrugated board production, from paper making to recycling of packaging collected from supermarkets.

FEFCO is finalising a spoken narration and the film is soon to be shown on EP Television. It will later be offered free of charge to other TV stations world-wide and the film may also be used by national corrugated packaging associations.
